

PURELIGHT

Featuring GenSmart™ Technology

PURELIGHT30

SPECIFICATIONS

Engine Yanmar, 2TNV70

Generator Lightweight GenSmart™ Permanent Magnet Generator (4 Pole) G24N1-018

Control System Integrated Key Switch Start with Hour Meter, Low Oil/High Temperature Shutdown Protection

Enclosure Constructed of Heavy Gauge Painted Steel

Mast 30' 3-Section Mast, Coiled Mast Cords
360 Degrees Rotating Tower

Trailer Commercial-Grade Winch Design and Suspension

Rated Output 4000 W (4-1000 W Metal Halide)
Enhanced Flicker-Free Operation

Unit Width 53" (Track)

Unit Height 54" (Closed Position)

Unit Length 14' (Overall Closed Position)

Unit Weight 1460 lbs Dry

Fuel Capacity 30 Gal (50 Gal Optional) Liquid Cooled Diesel

Run Time 85+ Hours (143 Hours)

PROTECTION

Two Year GenSmart™ Limited Warranty

Six Month GenSmart™ Satisfaction Guarantee

One Year Purelight30™ Limited Warranty

PURELIGHT20

SPECIFICATIONS

Engine Honda GX620 Gasoline/LP/Natural

Generator Lightweight GenSmart™ Permanent Magnet Generator (4 Pole) G24N1-018

Control System Single Key Switch Start, Individual Fused Lamps

Enclosure Durable ABS

Mast Telescopic Vertical Mast 6.2 Meters (20 Feet)
4 Sections, Each Cable 5 Feet, Winch Driven

Trailer Commercial-Grade Winch Design and Suspension

Rated Output 4000 W (4-1000 W Metal Halide)
Enhanced Flicker-Free Illumination

Unit Width 42"

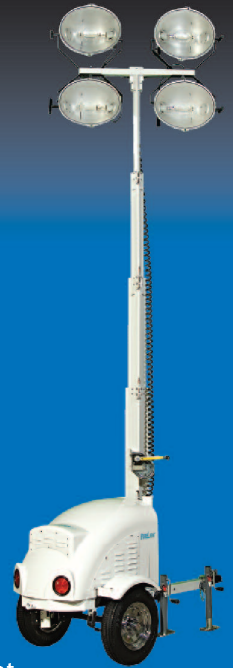

Unit Height 94" (Travel Position)

Unit Length 5 ft. w/o Tongue, 8 Foot with

Unit Weight 800 lbs.

Fuel Capacity 22 Gallons/Liquid Gasoline
Two 30 lb Cylinders/LP

Run Time 60 Hours of Run Time on 22 Gallons of Gasoline
30 Hours of Run Time on (2) 30 Gallon Propane Tanks

- A purchase price 50% less than the competition

- Propane option that delivers a cleaner burning alternative to gasoline and is coupled with lower emissions

PURELIGHT

Powering Your Innovation

FUEL SAVINGS

PureLight light towers consume significantly less fuel than comparable units. Fuel savings of 30% or more are typical.

EXTENDED RUN-TIME

Better fuel economy means longer run-time (30% typical) on a given amount of fuel. This means less on site fill-ups resulting in less overall operating costs.

HIGH EFFICIENCY GENERATOR

The LE patented GenSmart™ generator runs at significantly higher efficiency rates than any other comparable generator in the industry!

REDUCED EMISSIONS

Less fuel consumption means less emissions.

PureLight light towers are a more environmentally friendly choice.

REDUCED LIFE-CYCLE COSTS

Cost effective purchase price, lower maintenance costs and reduced operating costs all add up to lower life-cycle costs.
